TWENTY-THIRTY.io (\$2030) launched completely "raw" (stealthier than a "stealth launch"). However, the project was lucky to soon be surrounded by a strong community of like-minds and supporters that resonated with the project's narrative and use case: "Flipping the misdeeds of the kabal into fun & investment". The project's results so far can be summed up in this phrase: "POWER OF COMMUNITY". Against this backdrop, TWENTY-THIRTY.io aims to slowly & surely build traction for long-term growth into 2030 and beyond so as to bring value, fun, and trust/confidence to the market. By or before year 2030, the project aims for market cap valuation at USD 1 billion.

## Voice of the community:

- "I am in. Holding moon or dust..."
- "Let's go \$2030 🐻🐻🐻"
- "... new narrative people don't know yet, I drop here alpha \$2030"
