

# TWENTY-THIRTY.io Announces Measures Taken to Date for Enhancing Project Trust/Transparency/Confidence

Locking of project treasuries, disclosure of team wallets, etc., multiple increases in locked liquidity, plus others

**Tokyo, Japan** — Today, TWENTY-THIRTY.io announces all measures to date that the founders/creators/developers (hereinafter referred to as the "Team") have taken to enhance trust, confidence, and transparency in the TWENTY-THIRTY.io (\$2030) project. The goal is to show to the market an earnest project taking earnest actions. These actions include disclosure/locking of treasury wallets, disclosure of Team wallets (plus future locking/vesting), added locked liquidity pools (LP), and others. Please see full details below.

## **1. Disclosure/locking of the project's two treasury wallets**

The project has two treasury wallets that are completely locked or partially locked. Details are below.

Wallet address	\$2030 holdings	Amount locked	% of total
0x88bF2c412B0ededA0a8c5834b8d601f634C44169	20,000,000,000,000	15,000,000,000,000*	75
0x3bc03Ce94e9734c88286D9585591C4190fBD204	11,500,000,000,000	11,500,000,000,000*	100
Total	31,500,000,000,000	26,500,000,000,000	84.12

The Team acknowledges that certain milestones are needed before these holdings can actually help fund project needs, etc. The Team also recognizes possible market anxiety if such large holdings are being held in project wallets without vesting/locking. Against this backdrop, the Team has locked large portions of these holdings until 2024-11-08 23:59 UTC, to be renewed upon expiry according to need (e.g., for funding added LP). Vesting might also be considered upon first expiry. The Team aims to show that they are: committed to long-term success; not motivated by short-term gain; and have no intention of jeopardizing/destabilizing the project in any way.

\* The lock records for the amounts are viewable [here](#) and [here](#).

## **2. Disclosure of Team wallets, with a soon-to-be-announced locking/vesting program**

The following Team wallets are the complete wallets linked with the project's treasury wallets. All other wallets connected in bubble mapping have zero \$2030 holdings and are considered by the Team to be "abandoned".

Wallet address	\$2030 holdings
0x3e9ef9eC30B85a914EdB14FF7368C807296822BE	7,320,769,947,303
0xDC918D2dbbE51969B485423949674bb84C603282	9,822,959,902,713
0xb30a71607B902506EbBf38009768a30c7CbF8575	6,548,639,935,142
0xB13839c8Dc0Bb0131bb9879a43CB8713887b2BB7	3,274,319,967,570
0x54935978605fb48ea4B2cf462D12cdBb50c4B8F8	5,457,199,945,951
0x0cE9b7600d104519B6aAb19c827B708D5eC28b5D	6,867,949,912,172
Total	39,291,839,610,851

In addition, a follow-up press release will be issued upon final decision for locking/vesting these wallets (with possible ENS assignment) so as to assure the market that the Team is: committed to long-term success; not motivated by short-term gain; and have no intention of jeopardizing/destabilizing the project in any way.

## **3. Multiple LP additions totaling 0.989529962 ETH, all locked, more in subsequent weeks/months**

Since launch on 2024-07-14, the Team injected multiple instances of LP into Uniswap V2 pools, locking all liquidity tokens until 2049-12-31 23:59 UTC. Details on these locks can be found [here](#), [here](#), [here](#), [here](#), and [here](#).

#### **4. Collaboration on a multi-signature community wallet**

As evidence of the strength and commitment of the \$2030 community, a multi-signature wallet was set up by a major supporter and community member. This was done for holding and accepting donated ETH/\$2030 tokens for various project needs, such as LP and promotions/marketing, etc.

#### **5. Other actions for enhancing project trust/transparency/confidence**

- Fully renouncing the project's smart contract at a very early stage in the project, viewable [here](#)
- Coding no sales taxes on transactions into the project's smart contract
- Coding anti-whale/sniper functions into the project's smart contract to ensure project financial health
- Complete updating of the project's information on [etherscan.io](#), including update of project logo, confirming the identity of the project on the Ethereum blockchain and providing reference for the project and its identity that the market can trust
- Active utilization of the \$2030 community in making project decisions
- Actively soliciting and using opinions from the \$2030 community regarding important project matters so as to leverage the community's high level of knowledge and expertise
- Purchase of the Dex Screener info package, so as to relay confidence to the market/\$2030 community
- Publishing of a [whitepaper](#) regularly updated, so as to relay a sense of trajectory and earnest stewardship
- Creation of a [press release archive](#), so as to relay a sense of trajectory and earnest project stewardship
- [Token Sniffer](#) score enhanced from an initial 55/100 to the current 80/100, which is higher than other meme projects that are over 10 million USD in market capitalization
- Timely, regular posting on the [project's X.com account](#) with a mixture of fun/humor, meme content, project updates/data/info disclosure, so as to transmit earnest project stewardship
- Timely, regular daily updates and discussions by the Team in the project's [Telegram group](#), regularly outlining next actions/tasks so that the \$2030 community can see earnest project stewardship
- Launching of a [separate X.com developer account](#) as a "voice of the developers" to create more connection between the developers and the market and to relay ideas, hold extraneous discussion, and share business philosophies about the project and beyond

With the above, the Team is taking aggressive action to build project trust/transparency/confidence by seeking to understand market needs and identify/solve any existing problems.

#### **6. Next actions**

- A project business plan outlining the project's values, goals, and action plans, with detailed roadmaps, marketing plans, and burn schedules tied to milestones, so as to relay further confidence to the market
- Creation of a vesting/locking program for Team wallets, ENS assignment considered
- Publishing of detailed Team backgrounds in the project's whitepaper/project business plan so that the market and community can feel connected to the Team and their values, back stories, philosophies, etc.
- Contract auditing

Against this backdrop, the TWENTY-THIRTY.io (\$2030) project aims to surely build traction for long-term growth up to 2030 and beyond so as to bring value, fun, and trust/transparency/confidence to the market while also ensuring market needs regarding aspects such as volume and liquidity. By/before year 2030, the project aims for market cap valuation at USD 1 billion. Shorter-term goals are 1 million/10 million market cap, added LP, strategic marketing, and a mid-tier CEX listing.
