

TWENTY-THIRTY.io Announces Locking of Team Wallets

75% of team wallet \$2030 holdings locked for six months (renewable), plus information on plans for burn milestones

Tokyo, Japan — Today, as a follow up to the press release of 2024-08-29 (see [here](#)), TWENTY-THIRTY.io announces lock transactions carried out by the founders/creators/developers (hereinafter referred to as the "Team") for the \$2030 project Team wallets. The goal of this release is to show to the market an earnest project taking earnest action to enhance trust, confidence, and transparency. The Team aims to show that they are: committed to long-term success; not motivated by short-term gain; and have no intention of jeopardizing/destabilizing the project in any way.

1. Locking of Team wallets

Up to this point, the Team wallets have been holding approx. 39 trillion \$2030. However, the Team recognizes possible market anxiety if large \$2030 holdings are held in Team wallets without vesting/locking. Against this backdrop, the Team has locked 75% of these holdings for 180 days to 2025-03-12 23:59 UTC, to be renewed/adjusted upon expiry according to project operational needs. For details, please see below.

Team wallet address	\$2030 holdings	Amount locked	% of total
0x3e9ef9eC30B85a914EdB14FF7368C807296822BE	7,320,769,947,303	5,490,577,460,477 LINK	75

Total	39,291,839,610,851	29,468,879,708,136	75

2. Burn milestones

For when market trends are up and project growth proceeds, to signal confidence in continued holding to the market, the Team has decided to implement token burns tied to project milestones. For example, token burns are being planned for the following milestones, etc., up to the goal of 1 billion USD market cap and beyond. The actual burn amounts/percentages will be announced in a future press release.

- 1 million USD market cap, 2.5 million USD market cap, 5 million USD market cap, 10 million USD market cap, and onward

It is assumed that \$2030 burn supply will come from a combination of Team/treasury wallets and donated \$2030.

Against this backdrop, the TWENTY-THIRTY.io (\$2030) project aims to build an infrastructure of planning, incentives, and information disclosure that can help remind the market of the project's trajectory as a way to build trust/transparency/confidence for the long-term holding of \$2030, despite any short-term peaks/valleys. By/before year 2030, the project aims for market cap valuation at USD 1 billion. Shorter-term goals are 1 million/10 million market cap, added locked LP, more strategic marketing, and a mid-tier CEX listing.
