

TWENTY-THIRTY.io Announces Information on Token Burn Milestones

Tokens to be burned as \$2030 token meets future market cap milestones

Tokyo, Japan — Today, TWENTY-THIRTY.io (\$2030) announces information on plans for token burn milestones, in which burns of the \$2030 token will occur so as to fuel value increase in line with market cap growth and to incentivize further holding into higher price ranges.

Background

For meme coins with a longer-term time horizon such as \$2030, token burns tied to milestones are a useful means to incentivize long-term holding and the continued holding of coins through price upswings. Typically, on new highs, the market becomes incentivized to sell. Token burns tied to milestones are intended to help reverse this effect by providing a means to fuel further value increase despite hitting new highs. If, during an upswing, holders know that a new token burn milestone is not far away in market cap, they are incentivized to hold through the upswing because that future burn will limit coin supply, thus theoretically increasing coin value. Furthermore, if holders know that there is also another milestone coming later in the future, and if they are confident that the project can reach such milestone, they are incentivized to hold even longer. As \$2030 is a long-term project, the project aims to create long-term value growth and thus strives to provide numerous mechanisms that incentivize long-term holding, growth, and trust. It should also be noted that these token burn milestones were devised in tandem with and according to the advice of the \$2030 community, located here: https://t.me/twenty_thirty_io.

Timeline, milestones, etc. (tentative)

For when the macro market and the project itself sees upswings, and to signal confidence for sustained, long-term \$2030 holding, the \$2030 founders/creators/developers (hereinafter referred to as the "Team") have decided to implement token burns tied to project milestones. For example, token burns are being planned for the following market cap levels (USD).

- 250K, 500K, 1 million, 2.5 million, 5 million, 10 million, 50 million, 100 million, 500 million, 1 billion

\$2030 token burn supply will come from a combination of Team/treasury wallets and donated \$2030. The actual burn amounts/percentages are to be announced and will be matched with growth at each milestone so as to provide maximum value impact while being efficient at the same time.

About the TWENTY-THIRTY.io (\$2030) project

As a "meme coin for FREEDOM", the TWENTY-THIRTY.io (\$2030) project aims to disrupt what is known as the NEW WORLD ORDER (NWO)/Agenda 2030 and to "flip the misdeeds of the NWO kabal into memes, fun, and investment". \$2030 is the only crypto project that commodifies the debts to society of the NWO kabal. On its website, the project states: "WE TURN THE KABAL INTO MONEY. The worse they get, the stronger the project get. You see, the best revenge is MASSIVE SUCCESS. Hold \$2030 and be happy (◡_◡)".
