Narrative/description

\$2030 is movement coin and tokenized community for FREEDOM. The project flips the misdeeds of the New World Order kabal into memes, fun, and investment.

\$2030 is the only crypto project that commodifies the debts to society of the kabal driving the New World Order/Agenda 2030. The project conceptually imbues the notional value of these debts directly into the project and its tokens, thereby turning the kabal into an inversely pegged derivative, i.e., a tranching, digitized collateralized debt obligation (CDO) investment instrument. It's "debt as an asset".

Why

The goal of the project is give individuals that resonate with our narrative the chance to reclaim power from a system that many believe is largely designed to slowly destroy personal freedom, liberty, and social mobility. This is done by taking the perceived negative and flipping it into a positive.

How

The project is very actively managed as a long-term investment mechanism by the project creators/managers in a way similar to a hedge fund but without fee structures. The project boasts an average of 8 social media posts/day since launch, with an average of 2 press releases a month. The DNA of the project is: Streetwear brand/subculture × Memes, fun, and investment × Disruption of the New World Order/Agenda 2030 × Memetic movement coin and tokenized community. The project has been grown 100% organically from zero with no paid influencers/KOLs.

Catchphrases

"We turn the misdeeds of the NWO kabal into YOUR ASSET. The worse they get, the stronger YOU get."

"Not just a meme coin: A subculture... A brand... A tokenized community and long-term movement"

"OPPORTUNITY amid ADVERSITY: Because the best revenge is MASSIVE SUCCESS."

"IT'S 2030. YOU'LL OWN NOTHING": Nah bro, we'll own whatever we want.

"The revolution will not be televised. IT WILL BE MEME'd."

"Fuck your favorite band. Financial independence is the new punk rock."

"The first rule of the chart is that there is no chart."
