Increasing treasury/team wallet supply for future burns, the staking program, and growth needs

Tokyo, Japan — TWENTY-THIRTY.io (\$2030) announces today a package of \$2030 token buybacks. Previously, these buybacks were only announced on \$2030's X account [here](#), but going forward, the \$2030 Management Team has decided to issue press releases as well.

About TWENTY-THIRTY.io (\$2030)

Launched in July 2024 from Tokyo, Japan, \$2030 is the world's first memetic, cryptographic hedge fund. It's the only crypto project in the world that commodifies the debts to society of the NEW WORLD ORDER kabal. \$2030 uses the meme coin vehicle to deliver a sophisticated financial product.

At the core is an AI-driven, on-chain decentralized sentiment index oracle that quantifies societal debt and triggers token burns when thresholds for verifiable debts are breached, creating token scarcity. This creates a two-pronged perpetual motion narrative machine—it's built-in asymmetry at any market cap.

With a time horizon extending to year 2030 and onto 2050, \$2030 is essentially a long-term "memetic externality arbitrage strategy"—systematically long the monotonic rise in these debts to society while embedding deflationary scarcity that turns societal decay into asymmetric alpha. The worse things get, the more \$2030 "proves" its thesis. It's 2nd-grade math: debt up = price up.
