

OFFICIAL TWENTY-THIRTY.io WHITEPAPER

What is TWENTY-THIRTY.io (\$2030)?

Launched in Japan on July 14, 2024, TWENTY-THIRTY.io is a "meme coin for FREEDOM" (\$2030). The project highlights the concept of the NEW WORLD ORDER/Agenda 2030 and the threat that it poses to free society. This is done via memes, original artwork, and street culture design. \$2030 runs on the ERC-20 token standard.

Goals:

- To transform the "doom & gloom" of the NEW WORLD ORDER/Agenda 2030 into something positive
- To flip the misdeeds of the NEW WORLD ORDER kabal into fun & investment as a net benefit for the future and to transform negative vibes into positive ones
- To reach USD 1 billion in market cap valuation by/before year 2030

Tools:

- \$2030 token: The value derived over time is intended to give impetus to growth in charity allotment.
- Security: The \$2030 token is unrippable. As of this writing, the liquidity pool (LP) is locked until 2029-12-31 UTC 23:59. Also, further LP is to be (and has been) added in stages so as to fuel further growth, trust, and confidence, and these LPs will again be locked to the same expiry date. In addition, the token's smart contract is fully renounced (which means the project no longer owns it and can never make changes). Anti-bot/sniper/whale mitigation mechanisms are also employed, which help keep away buyers seeking to monopolize large portions of supply. The treasury also holds no more than 5% of Max Supply.
- NFTs: Caricatures of well-known figures set against catchy designs with a streetstyle, anime-like vibe, priced for casual buying to promote the project
- Low-fi design: Catchy, simple, unique design
- Old-school street culture design: Appealing to a wide range of the 50-&-under crypto market
- Launched "raw" (stealthier than a "stealth" launch) with no manipulated hype

How many \$2030 tokens are there?

\$2030 was launched on July 14, 2024 with 420 trillion created at genesis. There will never be more. 10 trillion have been burned (2.38%). 31.5 trillion (7.5%) is in the project's two treasuries for future project expenses/operational needs. Thus, the total Circulating Supply is 410 trillion (97.61%).

Who are the founders of TWENTY-THIRTY.io?

The founders and the dev/design team wish to remain anonymous for the time being, which is not uncommon in crypto. The project is using X.com and Telegram to promote the \$2030 token and foster a community, with all actions being taken to build confidence and trust. The goal is long-term traction and maximum value for investors/supporters. Thus, the team continuously strengthens the project by analyzing feedback/market reaction and ensures overall robustness so as to transmit maximum confidence and trust. It's a passion project that is personal in nature and close to heart for the founders, thus they aim to be earnest stewards of the project.

How is \$2030 secured?

\$2030 aims for transparency, confidence, and trust through various tools, such as anti-bot/anti-sniper/anti-whale tools, contract renouncement, LP locking, treasury locking, and regular auditing, etc. The team takes all possible action to grow trust and confidence and uses sites such as tokensniffer.com as a reference to monitor robustness. Any other security issues would relate to those that affect all ERC-20 standard tokens. Transactions, for example, can suffer from high fees if gas prices on the Ethereum blockchain spike.

Where can people buy \$2030?

\$2030 is available for trading on Uniswap:

<https://app.uniswap.org/swap?outputCurrency=0xAa6cED803aBcac1b63E59D5Df020a0C22f4812a2>

What makes TWENTY-THIRTY.io unique?

Unlike other similarly-themed coins, the project doesn't intend to slander public figures. There is a lot of doom & gloom and anger related to this topic—much of it warranted. TWENTY-THIRTY.io fully recognizes that the globalist kabal is a cancer on the face of humanity. And yes, everything they do is egregious.

But the project doesn't focus on hate for them nor news reports their acts—many people are doing that well already. The goal of the project is to flip the kabal into fun, positivity, and investment.
